

## ***Arivs Named Arizona's Fastest Growing Appraisal Management Company By Inc. 5000***

***It was also the 7th fastest growing real estate related company in the state, posting three-year revenue growth of 156%***

**Mesa, Arizona–September 11, 2018–Caffrey Corporation**, the parent company of **Arivs**, an appraisal management company, has been named the fastest-growing residential home appraisal company and 7th fastest-growing Real Estate related company in Arizona, according to *Inc.* magazine's highly-anticipated 37th annual Inc. 5000 ranking of private companies.

"Making the prestigious Inc. 5000 list is a great honor because it's an independent, third party validating our one-of-a kind business strategy, outstanding performance and dedicated customer service," said Bryan Caffrey, CEO of Arivs. "Our team is extremely proud of what they have accomplished, and they deserve the credit for this award and recognition that it brings."

Arivs offers appraisal management services with national coverage to mortgage lenders, but it maintains a local office in the largest real estate markets in the U.S. Each office is run by experienced, local appraisers that know the market, and select the best-performing appraisers for each assignment. The result is an unparalleled level of geographic competency that ensures high-quality appraisals are delivered on a consistent basis.

"Our combination of the resources of a national AMC with the expertise and personal touch of hands-on local management, means we can maximize the quality of appraisals we complete for clients," said Caffrey.

Arivs strategy enables it to combine the strengths of a national AMC, with the expertise of top-performing appraisers in a local market for a specific property type. A three-year-revenue growth of 156% and national ranking as the 2,688th fastest-growing private company in the U.S. are evidence that the firm's strategic vision is working well.

The Inc. 5000's aggregate revenue was \$206.1 billion in 2017, accounting for 664,095 jobs over the past three years. The list was created with the idea of providing an insightful look at the most successful private companies in the American economy.

Microsoft, LinkedIn, Yelp, Zillow are some of the well-known, and now well-established names that are past honorees of the Inc. 5000.

### **About Arivs**

Arivs' model combines the strength and depth of resources of a national appraisal management company, combined with more than 20 local offices in the largest real estate markets in the U.S. The offices are managed by experienced local appraisers that have decades of experience and an insider's knowledge of their marketplace. The result is a single point of contact, consistent performance and unmatched geographic competency. For more information, please visit Arivs.com.
